

Invasive Species Centre Webinar Series

# FORESTS UNDER ATTACK: THE HISTORY, DISPERSAL AND MANAGEMENT OF GYPSY MOTH

**Presented by David Dutkiewicz from the Invasive Species Centre**, this webinar will focus on the history of European gypsy moth and its subsequent arrival into Ontario in the 1980s. It will also discuss the current affected areas throughout Canada and the areas where gypsy moth has the potential to spread. Lastly, this webinar will examine best management options for gypsy moth and the measures landowners can take to help slow the spread and protect our forests.
